We only use Original Parts on any service that we do to keep our workmanship warrantee in order

Normal Oil / Diesel and Filter Service

Water Pump Replacement on 1000Kva Mitsubishi

- Ventilation

- Control Panels

Our DeepSea Controller is a microprocessor module for the control of generating sets. It is a complete metering system with excellent measurement technology.

The main goal of this new unit has been the elimination of the communication barriers between man and machine. The use of a large display screen and supervision software dedicated to rationally interact with the operator has consented to reach this intent.

- Generator Plinths

IS GENERATOR SERVICES (PTY) LTD will work closely with the customer, from start to finish, ensuring the generator is installed and commissioned safely, on time and with minimal disruption to your business.

With over 30 years of experience, we are confident we can support you in your Generator installation project.

We assure you of our full attention and best service at all times. Please do not hesitate to contact us for further information that may be required.

Regards
